

Through the award-winning **So-Go-Eco™** scheme, TODDS-AC are now a **CARBON SMART GOLD** certified company, meaning we have surpassed the baseline and demonstrate **exceptional environmental performance**.

Through our commitments, we have firmly implemented our environmental policies into our company structure, allowing us to:

- Make significant efforts to cut down and recycle as much waste as is reasonably possible
- Limit our company travel to only journeys which are essential
- Reduce the mileage of our fleet through the use of route-planning and regular vehicle checks
- Reduce our energy usage by making sure all the equipment is switched off when not in use

Did you know?

Since 2008, we have saved nearly 35 tonnes of CO2 through changes to our company travel and fleet policy, enough to fill a London double decker bus 188 times!

Our catalogue boasts a range of recycled and environmentally friendly products, so be sure to keep your eye out for these symbols!
