### **OUR PHILOSOPHY**

Our philosophy is simple – people are important. Whether it's the people using our products, the people selling them or the dedicated team working behind the scenes – people are at the heart of our company.

We're not your average business and this is because we make sure people are at the heart of our company. This is something that will never change; our customers and our employees will forever remain the most important part of our business. We care about you and your needs which is why we work hard to source quality products for our customers across the UK and Europe. We also take a great deal of pride in our team of workers who help us make it happen.

With a firm focus on service and support, we provide a variety of office seating, desking, storage, conference and training furniture, exclusively through the trade. We also offer a selection of delivery services to match our customers' needs.

#### BCF4 member

#### BCFA MEMBER

We belong to the BCFA (British Contract Furnishing & Design Association) which is the trade association for the British contract furnishing industry. As members of the BFCA, we remain committed to achieving higher standards in both the design of our products and the services we offer.

#### ENVIRONMENTAL POLICY – BS-EN ISO14001:2015 CERTIFIED

We care about the environment and to show this we regularly evaluate our procedures and implement new strategies to reduce our environmental footprint. We measure, manage and control our environmental impact in accordance with being certified to ISO 14001:2015.

### GREENGUARD POLICY

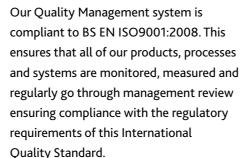

Where you see the Greenguard logo, you can relax in the knowledge that the product line has earned the Greenguard Certification Program issued by the Greenguard Environmental Institute. This assures that products designed for use in office environments and other indoor spaces don't exceed the strict chemical emissions limits.

#### GUARANTEE

Our products carry a 5 year component guarantee as standard, unless the product information details state otherwise. Not only that but all upholstery is guaranteed for 2 years. Our standard component guarantee applies when the product has been used for the purpose intended and in line with product use recommendations. If a replacement is needed due to normal wear and tear, accident, improper care or use, negligence, or a natural breakdown of colours and materials over extended time and use, then unfortunately it is not covered under our guarantee.

#### BS EN ISO 9001:2008 CERTIFIED

# END TO END SOLUTION

#### DELIVERY

Where you see the adjacent MTO logo, this means that the product is made to order and has an extended lead time.

#### OK UPH An Unlir

#### UK UPHOLSTERY AND ASSEMBLY

An Unlimited Fabric service is on offer to you, where any fabric of your choice can be selected for your order. Quality checks are carried out by our experienced staff throughout the production process to make sure your order is of the highest standard.

#### ASSEMBLED CHAIR DELIVERY

Put the kettle on and put your feet up – we can deliver our chairs to you fully assembled and bagged.

#### SPACE PLANNING

Our furniture library is available for use in space planning packages to help you design the perfect environment.

#### **BESPOKE PRODUCT RANGES**

Don't just follow the herd, dare to be different with some bespoke items. We're able to commission bespoke designs to match most specifications.

#### **DELIVERY AND INSTALLATION**

We're able to deliver and install our products anywhere in the UK and Ireland to help make life that little bit simpler. Our experienced engineers are available to support larger installations.

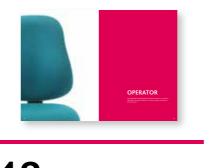

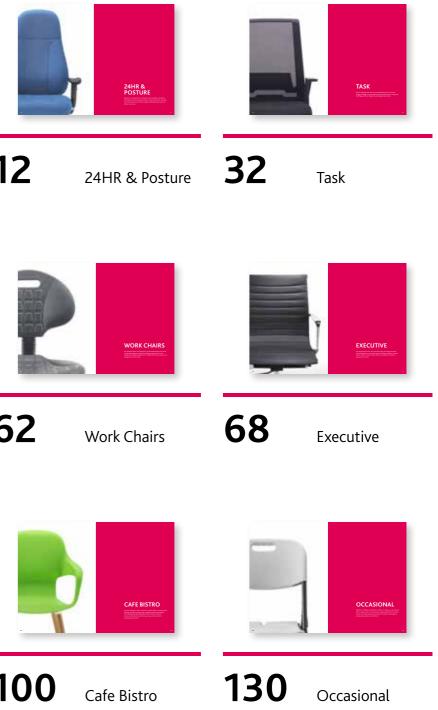

#### SITE ENGINEER SUPPORT

If any after sale issues arise, we have some helpful site engineers who will visit the customer and correct any problems they may have at a time to suit.

# **MECHANISM USER GUIDE**

# **DO YOU HAVE CORRECT POSTURE?**

### FIXED BACK

- Seat moves up and down.
- You can raise and lower the back.
- The backrest angle is fixed.

- ASYNCHRO / ASYNCHRO TORSION
- Seat moves up and down.
- You can raise and lower the back.
- Backrest angle can be fixed or set to free float.
- Seat angle can be fixed to desire angle.
- Torsion control knob can be adjusted to match body weight.

### SYNCHRO

- Seat moves up and down.
- Backrest and seat angle can be fixed or set to free float (2:1 ratio).
- Synchro chairs can be fixed in either 3, 4 or 5 positions.
- Torsion control knob can be adjusted to match body weight.

#### RATCHET BACK

SEAT SLIDE

functions

Back can be raised or lowered independently of chair functions.

### LUMBAR SUPPORT

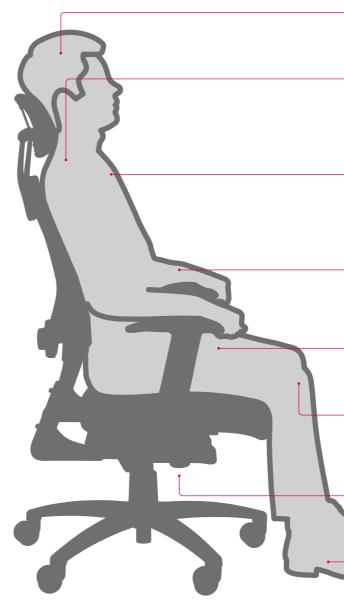

- Backrest provides support for the natural 'S' shape of the spine.
- Prevents slumping and reduces stress on the spine and pelvis.

#### STACKING CHAIR

- Designed to be safely stacked.
- Recommended number of chairs per stack is stated in product details if relevant

You probably spend several hours a day sitting at your desk, so you should make sure you're doing right:

- · Your chair should allow you to move easily and freely; we recommend leaving your chair unlocked to make full use of its movement whether you're on the phone, reading or reaching.
- When typing or working at a computer, the ideal seat angle would be tipped slightly forward to encourage an open posture.
- If you've been sitting for a while, move your feet around to stimulate the blood flow, and try not to slouch. •
- If you're going to use another chair, make the effort to adjust it to ensure you are receiving maximum support before • you start working.

Backrest and seat angle can be fixed or set to free float (2:1 ratio).

Seat moves up and down.

You can raise and lower the back.

Backrest angle can be fixed or set

to free float - i.e. in 'permanent

contact' with your back is fixed.

Seat moves up and down.

to match body weight.

Tilt of chair can be locked or set to

Torsion control knob can be adjusted

Knee tilt chairs can be fixed in either 3, 4 or 5 positions.

Seat moves up and down.

Torsion control knob can be adjusted to match body weight.

**KNEE - TILT** 

free float.

LOCK TILT

	HEAD & NECK
	To prevent neck muscles stiffening, a headrest should be used whenever possible.
	ВАСК
	The back of a chair should allow the 'S' shape of the spinal column to be formed naturally and be supported. A comfortable backrest will prevent slumping and reduce stress on the spine and pelvis.
	BODY
	The angle between the thighs and torso should be approximately 90-105 degrees. The back of the seat should be slightly raised to support the pelvis from tipping backwards and reduce pelvic stress.
	ARMS
	The armrests should support the forearms. The height of the arms should allow the shoulders and elbows to be relaxed.
	THIGHS
	The length and width of the thigh should be fully supported.
	LEGS
	The seat cushion should be rounded downward in a 'waterfall' shape allowing the legs freedom of movement and permitting unhindered bending.
	WEIGHT
5	Torsion control allows you to adjust the tension of the tilt to suit your body weight.
5	FEET
	Feet should easily and comfortably rest flat

on the floor.

# 24HR & POSTURE

Ergonomics is a design that complements the strengths and abilities of people, whilst minimising the effects of their limitations. Our Ergo chairs will provide you with all the strength and flexibility you need, the ability is up to you.

• FIRA certified to BS 5459 for 24 hour use • Infinitely adjustable asynchro torsion mechanism • Adjustable arms as standard • Ratchet back height adjustment

## WHAT IS ACOUSTICS?

The science of sound and understanding how sound travels.

## **1-WHY THE CONCERN?**

Noise pollution is background sound that can be annoying, disruptive and sometimes harmful. It's something we experience everyday, for example, when we're walking along a main road or we're trying to place an order in a busy café. Often it's not sound that we strictly notice, but when we do it can lead to frustration pretty quickly, especially in the workplace.

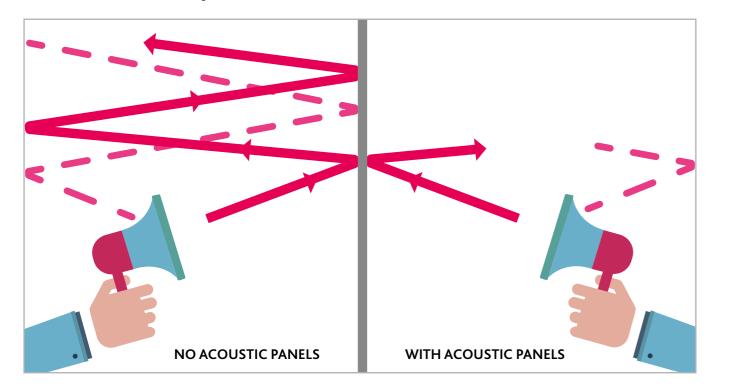

At work, noise pollution can be at its worst. The combination of telephones ringing, office equipment being used and multiple people talking, can interrupt your focus and leave you feeling tired and irritable. What's not helping acoustic matters is the rise in popularity of open plan offices and collaborative communal areas. This means fewer traditional walls and greater numbers of people working together in close proximity. All of these factors add up to more noise pollution in the workplace.

## 2 - THE SCIENCE

Noise pollution is reduced when reverberation time is kept as short as possible. Reverberation time is the time it takes for a sound to die down.

If someone were to stand in a room and shout, that sound will bounce off the hard wall and travel back into the room. If that person were to shout again whilst the first sound was still dying down, then both sounds would be heard at the same time but would be conflicting with each other

However, if the wall were covered in acoustic wall tiles it would be a different story. Some of the first sound would be absorbed by the soft acoustic panels, so the time it takes to die down would be reduced. Therefore, by the time the person shouted for a second time and the second sound was produced, the first sound would have died, meaning the sounds wouldn't have to compete.

### **3 - THE RESEARCH**

Extensive research has been carried out to prove that this constant noise is distracting, reduces concentration, affects health and well-being, and in turn affects productivity. After 10 years of research, The Centre for the Built Environment (CBE) have concluded that poor acoustics is the number one cause of dissatisfaction in the workplace. Not only that but it also affects employee performance more than any other factor.

They specifically found that sound distractions:

- · Shift our attention so that our focus is reduced;
- Make it harder for us to concentrate which can increase our stress levels;
- Make us abandon a current task to deal with the interruption:
- Ruin our train of thought so that we have to regain concentration.

### 4 - CASE STUDY

Here's an example of just how much background noise can affect vour business

Research commissioned by Brother proved that it takes an average of 15 minutes to regain your concentration after being distracted from a difficult task by unwanted noise.

Therefore, if a company employs 200 staff and each person is interrupted 5 times a day for 15 minutes, a 14% reduction in productivity is recorded over an average 8 hour working day.

Let's say that the average annual salary is £20,000 per person, then noise interruptions add up to a loss of £625,000, or in other words, 30 people's annual salary.

### **5 - THE SOLUTION**

A number of different products can be used to help achieve acoustic comfort like sound absorbing surfaces such as, acoustic ceilings, chairs, screens and floor finishes, along with acoustic barriers, partitions and masking systems.

Effective acoustics can be achieved using the A,B,C approach: Absorbing, Blocking and Covering.

Absorbing: Absorptive material + a high acoustical performance rating = an environment with better acoustics. Acoustic ceiling tiles and wall panels, carpeting, and soft furniture, will all help to absorb noise.

Blocking: Sound barriers interrupt sound paths. Sound absorbing screens can be placed strategically to block and prevent noise from travelling.

Covering: You can cover noise using a sound masking system so that noise cannot travel as far. Without masking, your voice can travel on average 40 feet, whereas this is reduced to just 20 feet with masking.

Correct application of the ABC rule can therefore lead to better acoustics in the workplace and a happier workforce who have improved concentration and are more productive.

### **6 - HELPFUL HINTS**

People work in different ways and on different tasks and the office environment needs to be able to adjust to this. Certain things that are worth thinking about when you're in the office:

- Try to keep conversations to a minimum when you're in an open plan workspace.
- Hold meetings in a room where you can close the doors.

• Don't put your phone on speaker when you're in an open plan office.

The Building Owners and Managers Association (BOMA) and the University of Maryland conducted a survey of 400 Business Managers. They found that a persons' productivity could increase by an estimated average of 26% if noise was kept under control.

Consider it this way... If your office had a leak it would be dealt with immediately. Just because you can't see and feel sound in the same way you can a water leak, doesn't mean it's not as, distracting to the workplace. Therefore, an investment in acoustic solutions can improve your efficiency and the well-being of your staff, as well as show you a return on your initial investment in just a matter of months.

ber of months, rather than years.	
200 X £20,000 = £4,000,000 5 X 15 min = 1hr 15min £20,000 / 250 days = £80pp pd (per person per day) £80 / 8 hours = £10.00 ph 1HR 15 mins = £12.50 pp pd (per person per da £12.50 X 250 = £3,125 pp py (per person per ye £3,125 X 200 = £625,000	
25,125 X 200 - 2025,000	

### £625.000 LOSS PER YEAR

 Keep phone conversations short or take long phone calls in an enclosed space.

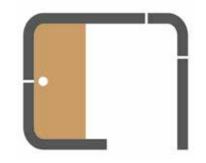

• Be considerate of your audience - not everyone around you will want to hear about your weekend.

• Try not to interrupt people if they look like they're concentrating on something, either come back later or drop them an email.

# WHAT IS TITAN?

# **OUR STANDARDS**

We design & manufacture the toughest and finest range of classroom furniture in the world!

For many years children have sat on a wide variety of chairs that are inadequate for their needs and a classroom environment. A child will sit on a chair for up to six hours a day, over a period of 11 years or more. School furniture must therefore be durable, comfortable and easy to maintain. Titan Furniture is an award winning supplier, which manufactures premium classroom furniture with the aim to improve the safety and health of our school children. That's why we were the first UK manufacturer to meet new British ergonomic standards set out by the Technical Committee for Europe Cen/TC207.

Our chairs are designed to these standards which set chair dimensions, heights, angles and back support for every age group, so as to encourage good posture. Good posture not only means our children will be healthier, it also means they should be more comfortable and therefore they should be more attentive in class.

Our range is covered by industry standards. All of our products are designed specifically for the unique postural needs of school children and the demanding environments of schools. The ultra-strong construction of all our furniture is designed to withstand high impacts and be anti-tamper, as well as being low maintenance. Our seating range comes in up to six different seat heights to suit different age groups. They are also available in a variety of colours to match your schools colour and to provide a stimulating environment.

### **DESIGNED FOR CLASSROOMS**

Our seating range comes in up to six different seat heights to suit different age groups, encouraging supportive posture. They are also available in a variety of colours to match your schools colour and to provide a stimulating environment.

### **ERGONOMICS**

Our seating is produced in a range of sizes to best accommodate children of all ages. The chairs back angle promotes a positive S shaped spine, which reduces the risk of lower back pain.

### **ISO 9001** - 0

We comply with ISO 9001 quality control standards, ensuring our products and services are of the highest possible quality. This provides you with peace of mind during the entire ordering process and product life-cycle.

## **STRENGTH**

The ultra-strong construction of our premium furniture range is designed for the toughest classroom environments. Our range is built from highly durable polypropylene and super strong steel. All are independently tested for their strength and durability.

### **INDEPENDENTLY TESTED**

All of our products are independently tested to British Standards for ergonomics, strength and stability. Ergonomics for schools BS EN 1729:1 Strength and stability for schools BS EN 1729:2

### SAFETY

Designed for the needs of the classroom, our products are anti-tamper and low maintenance. All of our products have no pinch points or sharp edges that may cause injury, many chairs have an anti-tilt leg.

### RECYCLABLE

We are committed to helping deliver environmentally friendly products. All of our metal and plastic can be recycled to help you meet your recycling targets.

### LONGEVITY

We are confident in the quality of our products. Our whole range carry extensive guarantees, protecting you against the unlikely event of product failure. Our products are made from recyclable materials to help meet your recycling goals.

• One-piece contoured seat shell

- Waterfall seat for enhanced comfort
- Titan Teach has integral 18mm MFC adjustable writing tablet
- 28mm tubular steel construction

Introducing the Titan Teach and Titan Move range. Take control of your learning environment with our new dynamic classroom seating solution. Teach and Move allow you to create multiple configurations to enable individual, group or large team learning, and to allow students and educators to connect more effectively.

We are proud to work with a dedicated selection of the UK and Europe's longest established and best recognised upholstery fabric, PU, Vinyl and Leather manufacturers.

The fabrics offered within this section are a selection of the most popular within the market, and are suitable for applications ranging from operator/task seating, soft seating and for the upholstery of vertical surfaces, such as desk mounted and floor standing screens (where indicated).

### UNLIMITED FABRICS

Where you see the above icon the product is available upholstered to your exact specification. Choose from multiple on-trend finishes to match your market place or corporate colour scheme, or simply something different to brighten up your business environment.

### **FIRE RETARDENCY**

The fire retardency or CRIB rating of a particular fabric measures its ability to resist ignition from an exposed flame. There are a variety of tests for the flammability of upholstery fabrics within the UK - we have listed a brief description of those applicable to our market below (please note this is not exhaustive; if further information is required please contact us).

Low Hazard - tested to BS7176:2007 Low Hazard fabric ratings are suitable for use within the general office environment

CRIB 5 - Where a fabric has been treated and tested to standard it is suitable for most uses, particularly contract environments like hotels, where the impact of a fire can be serious.

CRIB 7 - This is a more stringent test version of CRIB 5. Fabric that passes this test is suitable for more hazardous environments like prisons or offshore installations.

# FABRIC EXPLANATION

The range of manufacturers, finishes and price bands offers a solution for all specifications and budgets - please contact us for further details or assistance.

Where environmental credentials are a major consideration we are also able to source and recommend from a wide choice of environmental fabrics, made from recycled raw materials, or materials composed of rapidly renewable sources such as wool or innovative bast fibres from nettles, hemp or even recycled coffee sacks.

### PLEASE NOTE:

Fabric Bandings - Should your fabric of choice not be listed please contact our sales teams who will be happy to assist. Please ensure you check the suitability of your selected fabric for its application prior to ordering.

Leather - All leather fabrics are priced on application.

Fabric Swatches - We recommend that your final fabric selection is made based on a physical swatch only. Please note colour accuracy of printed fabric swatches is not guaranteed and is intended as a guide only.

Chieftain Fabrics are experts in vinyl upholstery. It is our only focus and we believe that for this reason, we are the best at what we do. We have specialised in the design and production of high quality performance fabric and contract upholstery for over 60 years.

With our unique mix of specialist expertise, innovative R&D and advanced materials, we produce an inherently better fabric.

We are constantly striving to keep up with ever changing technologies and we have the only fabric that has passed both the Tropical test and Crib 7.

Honeysuckle

At Camira we've been weaving the fabric of the world for decades. We produce fabrics for spaces and places, from offices to schools, trains to buses, and shops to hospitals. We manufacture over 8 million metres of fabric a year so you're sure to have touched upon our fabrics either at work, at play or on the move. From our manufacturing plant, registered to ISO 9001 and 14001 standards, we make 8 million metres of fabric a year meeting international flammability regulations, celebrating colour, design, technical and environmental innovation.
